Company FAQ

Password Reset

Employees can reset their account password from the account settings page.

Open Settings, select Security, and choose Reset Password.

Enter your current password and then enter the new password twice.

Save the changes to complete the password reset.

IT Support

For technical support, contact the IT support department.

IT support can assist with account access, network connectivity, software installation, and system troubleshooting.

Leave Policy

Employees should submit leave requests through the employee management system.

Leave requests must be approved by the employee's supervisor.
